

I worked with Daniel, Slav and their team on several construction projects such as the Pluto gas plant, BHP Newman Hub and the FMG track and bridge alliance.

A skilled, hardworking team that never failed to deliver the best quality works and to the highest safety standards.

A good eye for details, paired with an excellent proactive approach and the right attitude were always a major player in completing the works on time. Even when working with tight schedules, these guys always succeeded in meeting their deadlines.

I highly recommend DnS for any civil contractor that requires a team of real professionals.  
No job is too big or too small for these guys.
